SUBJECT New Oil Soundings in Tzintea-Baicol

DATE DISTR. 18 Mar 1954

NO. OF PAGES 1

25X1

NO. OF ENCLS.

SUPP. TO
REPORT NO.

25X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES. WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. New oil wells have come into production in the oil-bearing region of Tzintea-Baicol, in the Rumanian department of Prahova. It has thus far been impossible to learn their number or the amount of their production. It is also known that restorations have been made at fifteen other wells, hitherto regarded as exhausted. Additional drilling continues and the restoration of oil derricks continues, vigorously.
2. Packing cases containing equipment for the oil industry have been arriving at Constanta from the USSR. They are consigned to those oil regions where the results of operations have been satisfactory. It is not known whether the equipment in these cases was really made in the USSR.
3. Oil tankers are constantly loading Rumanian oil in the Black Sea port of Constanta, which they are taking to the northern ports of the USSR. Oil loading at Constanta is, of course, commonplace, but the destination of this oil seems unusual.
4. The Resita factory in Rumania has received new equipment for speeding up production of the machinery needed for Rumanian oil extraction.
5. The Rumanian Militia continue to take more and more severe measures for control in the oil regions. These are needed to protect the precious equipment used there.
